

Chart ILIAS Plugin

1. Introduction

Chart ILIAS Plugin is a Page Component Plugin which allows the insertion of Charts in the page editor

2. Supported ILIAS Versions

The Plugin supports ILIAS Versions 10.x.x

3. Feature Overview

- i. Selection of the chart type: Pie, Line, Horizontal and Vertical Bar
- ii. Selection of data format (number, percent)
- iii. Selection of maximum displayed value in X-Axes and Y-Axes chart
- iv. Entry of 1 to n categories
- v. Entry 1 to n datasets
- vi. Entry dataset values
- vii. Deleting individual categories
- viii. Deleting individual datasets
- ix. Shifting individual numerical values (using arrow keys)
- x. Labeling options (Category label, Datasets label, Legend)
- xi. Currency symbol for numbers as data format
- xii. Assignment of a color per category
- xiii. Assignment of a color per dataset

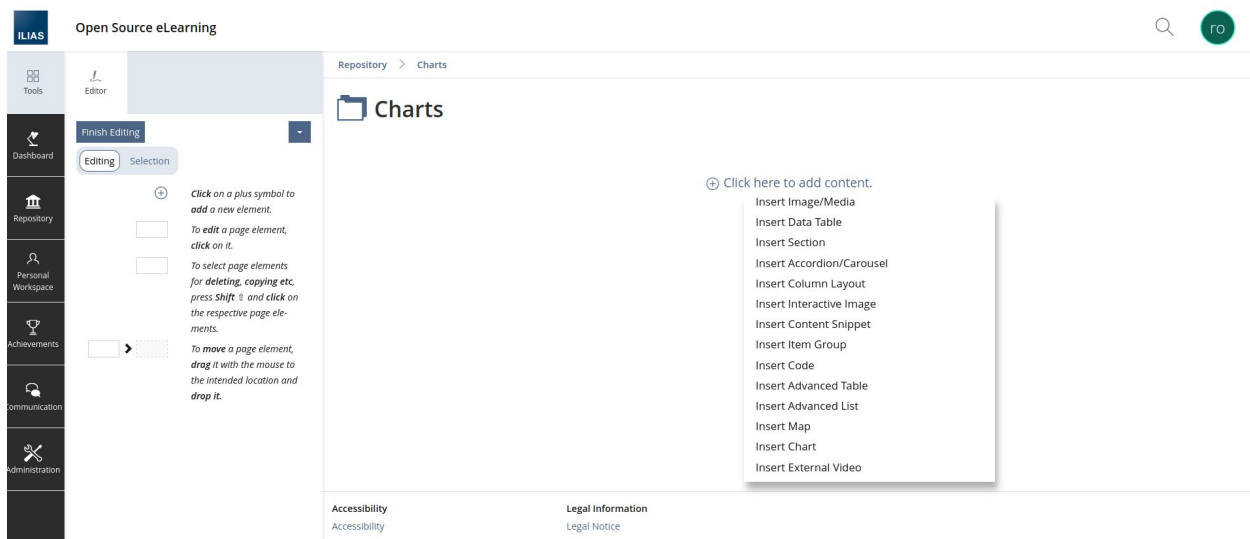

4. Installation / Activation

- i. After downloading the Plugin as ZIP from Github, rename the extracted directory to Chart and transfer it to
Customizing/global/plugins/Services/COPage/PageComponent
 - ii. Log in to the ILIAS installation as Administrator and go to Administration > Extending ILIAS > Plugins
 - iii. In the list of plugins find the Chart plugin and choose Install in Actions
 - iv. After installation choose Activate in Actions
- The plugin has been installed and activated and is ready for use.

5. Usage

Create Chart

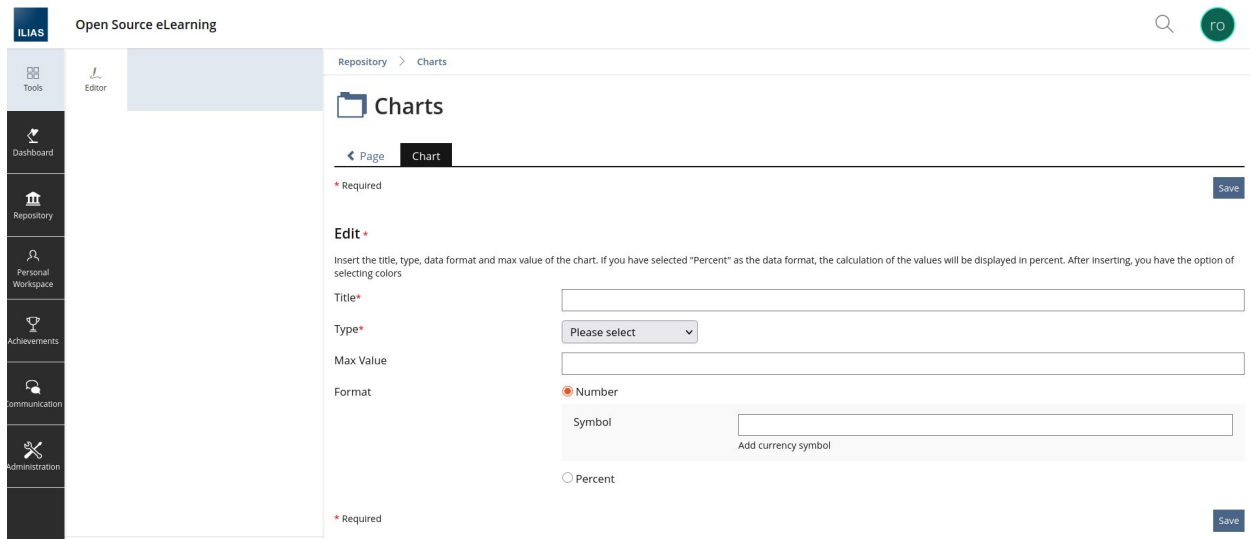

A chart can be created by clicking on the button „Click here to add content“ and selecting the menu entry „Insert Chart“.

The user should now fill in the following information about the chart:

- Title Chart
- Type Chart
- Data Format
- Key and Value for categories

* All fields are required

☐ Percent

* Required

The chart will be displayed as follows:

Once the chart is created, the user needs to input the data to display it correctly.

The screenshot shows the 'Edit' form for a chart in the ILIAS Open Source eLearning interface. The left sidebar is the same as in the previous screenshot. The main content area is titled 'Charts' and includes tabs for Page, Chart, Categories-Datasetnames, Datasets, and Style. The 'Edit' form has a 'Save' and 'Cancel' button at the top right. Below the title, there is a description: 'Insert the title, type, data format and max value of the chart. If you have selected "Percent" as the data format, the calculation of the values will be displayed in percent. After inserting, you have the option of selecting colors'. The form is divided into two main sections: 'Categories Names' and 'Datasets Names'. The 'Categories Names' section has a 'Title' field and four rows of input fields for 'January', 'February', 'March', and 'April', each with a color selection icon. The 'Datasets Names' section has a 'Datasets' field and three rows of input fields for 'Berlin', 'Hamburg', and 'Leipzig', each with a color selection icon. A '*' Required label is at the bottom left, and 'Save' and 'Cancel' buttons are at the bottom right.
